

## Elite Cyl & Elite AIR

Unvented Cylinders Product Guide

Based in the UK, we are focused on service, availability, quality, performance and reliability. Utilising the vast experience of the team at **UK Cylinders** and our processes and procedures to deliver on these key objectives.

We are a market led company with many years' experience in manufacturing and product development, this ensures our products exceed our customers needs.

**UK Cylinders** hold strong values in terms of supporting customers requirements in an ever changing market.

OUR AIM IS TO PROVIDE THE BEST QUALITY AND VALUE HOT WATER STORAGE PRODUCTS AND TO CONSIDERABLY EXCEED OUR CUSTOMER EXPECTATIONS BY PROVIDING MARKET LEADING SERVICE LEVELS IN ALL AREAS OF OUR BUSINESS.

## Product Range

## Manufacturing Process

## Performance & Reliability

At UK Cylinders we pride ourselves in employing highly skilled engineers to be able to produce a wide range of products suitable for all of our customer needs. Our Elite Cyl products are manufactured to the highest quality, with the best raw materials and ancillary components in many different specifications.

If you can't find the cylinder you need in our product guide then please speak to your local representative or our sales office as we can produce bespoke products if required.

Our products come with a manufacturers guarantee (see details in product guide) and are fully tested to ensure they are compliant with the latest standards and regulations.

At UK Cylinders, we employ the best local manufacturing experts to produce the high quality products while maintaining value for money.

Our engineers have a vast knowledge manufacturing water heating products with a passion to significantly exceed our customer expectations, in terms of product quality and service. They understand the importance of the customer and work diligently to make sure they return to **UK Cylinders** next time they have a requirement.

Coupled with the latest manufacturing technology, our team set the highest bar for quality, flexibility and the ability to provide customer solutions. To keep lead times to a minimum we manufacture most components in-house, from rolling and punching the stainless-steel sheet, precision welding, insulating and casing, we ensure the highest standards are achieved.

Providing superior hot water performance whatever the application, along with value for money, in both the domestic and commercial markets.

Having invested heavily in our processes along with the latest manufacturing technology and systems, we are confident that the product we produce offers excellent reliability and value for money.

## Quality and Service

## **Availability** and **Stockists**

# Environmental - and a more sustainable future

Customer service is at the forefront of the business philosophy at UK Cylinders which means the team know THE CUSTOMER ALWAYS COMES FIRST.

We will respond and reply same day to any requests.

We carry significant stock of a wide range of products in our warehouses, as well as stock on the ground with our merchant partners. When an order is placed for a stock item before 12 midday, we will despatch it the same day. Arriving within a few days, to over 95% of mainland UK.

At UK Cylinders, we pride ourselves in working closely with our network of merchant stockists, supporting them providing hot water solutions to their customers.

Please contact us on 03330 329 650 or sales@ukcylinders.co.uk if you require details of your local stockist.

Our environmental management system allows us to promote efficient manufacture of our products.

Key processes and procedures help us to move towards a more sustainable future and minimise any negative impact on the environment.

Please contact us on **03330 329 650** or **sales@ukcylinders.co.uk** 

## Elite Cyl

### Designed for performance and reliability

The Elite Cyl sets the standard for unvented cylinders, manufactured to the highest quality in our UK factory by the best manufacturing specialists.

We manufacture our cylinders in the UK using high quality Duplex stainless steel, this enables us to provide a 25-year warranty. Each cylinder is supplied with market leading components to give peace of mind for years to come. The Elite Cyl provides fast flowing water to all outlets and even in high use situations it is designed to reheat quickly with its superior performance and low heat loss.

#### **SPECIFICATION**

- > Supplied with a manufacturer's backed 25 year cylinder warranty and 2 years parts warranty.
- > Diameter is 545mm from capacities 90L to 300L.
- > Manufactured from high grade Duplex Stainless Steel.
- > Fully insulated with 50mm 100% CFC and HCFC free polyurethane to minimise heat loss.
- > Lightweight construction with high quality and 100% recyclable silver casing.
- > Supplied with high quality unvented components.
- > Supplied with a mechanical cylinder stat for simple electrical installation.
- > All plumbing connections are clearly identified with their description embossed into the cylinder case.
- > 22mm compression connections complete with nuts and olives on the 90ltr-300ltr and 28mm connections on the 400-600ltr.
- > Market leading and highly efficient primary coil which reduces reheat time and saves fuel bills.
- > Long-life 3kW Incoloy immersion heater supplied as standard.
- > Immersion heater upgrades available upon request i.e. Titanium or 6 kW.
- > Supplied with all safety controls as required by UK Building Regulations.

## Trade Friendly Design

### Complete ease of installation

All UK Cylinders products are designed to ensure a problem free installation for our valued trade customers. We design our products for ease of installation and handling so they can be sited almost anywhere in the building. Please see the table below which lists all the supplied components provided with our vast range of cylinder solutions.

## Elite Cyl Slimline

When installation space is at a premium, we offer the same great product but with a much smaller footprint

The Elite Cyl Slimline is manufactured to the same high standards as all other Elite Cyls but at 475mm diameter to fit in smaller applications or to fit through narrow cylinder cupboard doors, often found in older houses. The Elite Cyl Slimline is also supplied with a 25-year warranty and with high quality components for peace of mind.

#### **SPECIFICATION**

- > Supplied with a manufacturer's backed 25 year cylinder warranty and 2 years parts warranty.
- > Diameter is 475mm from capacities 60L to 200L.
- > Manufactured from high grade Duplex Stainless Steel.
- > Fully insulated with 50mm 100% CFC and HCFC free polyurethane to minimise heat loss.
- Lightweight construction with high quality and 100% recyclable silver casing.
- > Supplied with high quality unvented components.
- > Supplied with a mechanical cylinder stat for simple electrical installation.
- > All plumbing connections are clearly identified with their description embossed into the cylinder case.
- > 22mm compression connections complete with nuts and olives.
- > Market leading and highly efficient primary coil which reduces reheat time and saves fuel bills.
- > Long-life 3kW Incoloy immersion heater supplied as standard.
- > Immersion heater upgrades available upon request i.e. Titanium or 6 kW.
- > Supplied with all safety controls as required by UK Building Regulations.

## Solar PV **Priority Cylinder**

### Free hot water from your PV array

Due to the growth in popularity of PV systems across the UK, UK Cylinders have developed a specifically designed 'PV priority' cylinder in both Direct, Indirect & Heat Pump models.

The Solar iBoost+™ is mounted to the cylinder and pre wired to the 1st immersion heater which is relocated at the base of the cylinders to ensure maximum available water capacity can be heated.

Throughout the day the water temperature is raised, reducing the operating time of the home's heating system.

### **SOLAR BOOST+**

Increases self consumption of PV

#### **FEATURES**

- > Compatible with Battery Storage
- > Can assist in Building Regulations / SAP by reducing the number of solar panels required
- > Programmable Timed Boost
- Compatible with Dual **Immersions**
- > Can be Retrofitted to **Existing Systems**
- > User Friendly Display
- > Quick Installation Time
- > Wireless Technology

#### Solar iBoost+ Performance

The CT clamp measures energy flow and switches Solar iBoost+ to maintain export at 100W or to the installer set threshold.

### **Solar iBoost+ Key Functions**

- > Manual Boost in 15 minute increments up to 2 hours.
- > Timed programming on 5/2 day basis, 2 times each day for economy settings.
- > Set Season for timed programming.
- > Easy connectivity with 'Optional' iBoost+ Buddy (purchased separately) for remote operation and monitoring.
- > Operating range between devices 30m indoors.

## Elite Cyl Horizontal

Designed with performance in mind.

The Elite Cyl Horizontal is designed for use in applications where a vertical cylinder will not fit, typically in a loft space. In dwellings that require all the benefits of a mains pressure cylinder, but you have limitations on space, the Elite Cyl Horizontal is the product for you.

The Elite Cyl Horizontal is supplied with installation cradles, high quality components and a 25-year warranty for peace of mind.

#### **SPECIFICATION**

- > Supplied with a manufacturer's backed 25 year cylinder warranty and 2 years parts warranty.
- > Diameter is 545mm from capacities 120L to 300L.
- > Manufactured from high grade Duplex Stainless Steel.
- > Fully insulated with 50mm 100% CFC and HCFC free polyurethane to minimise heat loss.
- > Lightweight construction with high quality and 100% recyclable silver casing.
- > Supplied with high quality unvented components and mounting cradles.
- > Supplied with a mechanical cylinder stat for simple electrical installation.
- > All plumbing connections are clearly identified with their description embossed into the cylinder case.
- > 22mm compression connections complete with nuts and olives.
- > Market leading and highly efficient primary coil which reduces reheat time and saves fuel bills.
- > Long-life 3kW Incoloy immersion heater supplied as standard.
- > Immersion heater upgrades available upon request i.e. Titanium or 6 kW.
- > Supplied with all safety controls as required by UK Building Regulations.

## Looking for our Universally Compatible Heat Pump Cylinders, PV Ready Cylinders and Buffers?

We have an extensive product range of Low Carbon system solutions suitable for Air Source and Ground Source including:

- > Universally Compatible Heat Pump Cylinders 120-600L
- > Slimline and Combined Buffer Integrated Options
- > Pre-Plumbed Heat Pump Cylinders
- > Horizontal Heat Pump Cylinders
- > Solar PV Priority Cylinders
- > Buffers 50 600L

Scan the QR code to see our specialist Heat Pump brochure

## Elite Air Standard

The first choice internal expansion unvented cylinder. Designed for performance and reliability.

Our range of superior quality Elite AIR cylinders are built using high grade Duplex stainless steel and designed to provide fast flowing hot water to single or multiple outlets. Manufactured to the highest standards and supplied with innovative components to ensure quick recovery, low heat loss and economic use of energy.

For your peace of mind, they come with a 25 year cylinder and 2 years parts guarantee, making it a great investment in your hot water system.

#### **SPECIFICATION**

#### **Customer Care**

#### **Continued support**

All **UK Cylinders** unvented products come with a manufacturer's warranty so if you have a breakdown or fault, we are on hand to provide customer support to put it right.

Please contact our team on 03330 329 650 or email customercare@ukcylinders.co.uk and we will be there ready to help you.

#### Trade Friendly Design and Installation

#### Regulations

Please refer to Section G3 of the Building Regulations (England and Wales), Technical Standard P3 (Scotland) and Building Regulations P5 (Northern Ireland). All Unvented units with a capacity over 15 litres must be installed by a competent installer in accordance with these regulations.

#### **Mains Supply**

UK Cylinders unvented cylinder Elite Cyl require a minimum of 1.5 bar (max 10 bar) mains pressure and 20 litres per minute flow rate to ensure that the cylinder meets its minimum capabilities. Higher mains pressure and flow rates can return a higher performance from the cylinder.

**Note:** Cylinder must be connected to a mains water supply, not a well or borehole.

#### **Cylinder Siting**

**UK Cylinders** range of unvented cylinders can be sited almost anywhere in a dwelling, particularly with the wide range of products we supply, providing hot water to outlets above and below the cylinder.

#### Wiring

All electrical wiring should be fitted in accordance of the control scheme being used and by a competent electrician and the latest IEE regulations. **UK Cylinders** provide controls with all unvented cylinders to ensure the safe operation of the unit within a central heating system.

Please refer to the installation guide for full details.

#### **Boiler Compatibility**

The Elite Cyl cylinders are compatible with all appliances that are fitted with an integral control thermostat and its own energy cut-out (these include natural gas, lpg, electric and oil boilers).

Heat sources without full thermostatic control (Aga etc) cannot usually be installed with an unvented unit. Please consult the installation guide for comprehensive information.

#### **Secondary Return Connection**

As standard a secondary connection is fitted on indirect models of 200 litres and above.

## Elite Cyl & Elite Air

External and internal expansion unvented pre-plumbed systems

## The ELITE family of Pre-plumbed cylinders are the 'ready to go' complete package.

The Pre-plumbed is a factory fitted, plumbed and wired version of the Elite cylinder.

When you and your clients want to provide a consistent and neat appearance, Pre-plumbed is the way to go.

We also have a full range of combi boiler compatible controls to ensure uniform controls offering across your sites.

Our pre-plumbed hot water storage cylinders are available with either an internal expansion vessel: 'ELITE AIR' or an external expansion vessel 'Elite Cyl' models.

Installation engineers will love our pre-plumbed units as they save valuable time and of course space!

As we manufacture these units in a factory-controlled environment you can be assured of consistent quality and continuity of all components and workmanship across every installation.

#### **FEATURES**

- > Available in indirect models from 120, 150, 170, 200, 250 and 300 litre capacities. All sizes available in twin and single zone configuration.
- > Solar indirect models: 170, 200, 250 and 300 litre capacity. All sizes available in twin and single zone configuration.
- > Simple to use L.E.D controls.
- > Advanced 7 day programmer giving room thermostat and hot water control.
- > Control system provides separate control of heating and hot water zones.
- > Delayed start thermostat offers SAP benefits.
- > Automatic bypass valve fitted for system efficiency.
- > Heating expansion vessel, pressure gauge, filling loop, expansion valve provided.
- > Indirect thermal controls.
- > System boiler models also available. This is the same specification but the following items are removed from the pre-plumbed package: Heating Expansion Vessel, Filling Loop and Heating Circulating Pump.
- > 25 year cylinder warranty and 2 years parts warranty.
- > Cylinder manufactured from high grade Duplex stainless steel.
- Flat base for stability and ease of siting.
- All plumbing and wiring connections handy at the front of the unit.
- > Totally insulated with 100% CFC-Free (ODP zero) polyurethane to minimise heat loss (50mm thick).
- > Long-life 3kW Incoloy immersion heater with integral thermostat and thermal cut-out.
- > 1/2" temperature and pressure relief valve operating at 90°C / 7 bar on Elite cylinders and 90°C / 10 bar on Elite AIR cylinders.

#### **BENEFITS**

- > Intuitive controls for ease of use for home owners.
- > A cost effective and simplified installation for a professional, neat and tidy layout and reduced labour time.
- > Installations are consistent across the range for uniformity and greater customer satisfaction.
- Factory fitted components and controls assists in reducing expensive customer care visits to site.
- Stringent quality control through manufacture and assembly.
- No requirement for feed and expansion tanks or water storage in loft spaces.

# Controls Packages to suit all applications

### External and internal expansion unvented pre-plumbed systems

UK Cylinders have a full range of controls packages to choose from, including Combi controls, Pre-plumbed solutions, and our WIFI-enabled smart options. This allows a uniform specification across the site.

The trusted family of controls are easy to set up and simple to use. The P5 and P6 range include the option of fuss-free upgrade to the smart wifi version using the click-front fascia technology.

Click and Go backplate. Simply and safely switch over any of the 5 and 6 series products without disconnecting the power or re-wiring thanks to the innovative click on/off backplate with just a 5 volt connection.

UKC P6 offers an enhanced screen and clear digital display. Sitting on a smaller footprint than the P5 this ultra modern thermostat sits neatly into any homes decor.

UKC P5 Range offers a clear LED display with an easy to use menu and slimline built into the wall appearance.

UKX060	2 zone combi kit	2 x RTP5 programmable room thermostats	1 x wiring centre	2 x ZV222PM motorised valves
UKX061	1 zone combi kit	1 x RTP5 programmable room thermostat		
UKX062	2 zone combi kit WIFI	2 x RTP5W programmable WIFI / APP room thermostats	1 x wiring centre	2 x ZV222PM zone valves
UKX063	1 zone combi kit WIFI	1 x RTP5W programmable WIFI / APP room thermostat		

- > Free APP and software updates, Apple IOS & Android.
- > No subscriptions or costs to use the APP.
- > No ongoing running costs.
- > No router / hub or additional components required.
- > Hard wired back plate, low voltage, Not RF = no risk of ANY lost connections even in the largest house types.
- > Thermostat can be used locally without the internet whereby user is not yet internet connected or doesn't wish to use as a smart device.
- > Home owner energy saving benefit & control remotely to suit lifestyle.
- > Offers clients a premium product at forefront of heating technology.
- > Premium homes specification feel.

## Direct Pre-Plumbed Cylinders

Pre-plumbed DIRECT cylinders are available across our Elite Cyl and Elite AIR range, saving time and offering consistency which is ideal for apartment blocks or other multi-occupation buildings such as offices.

#### **SPECIFICATION**

- > 25 Year cylinder warranty and 2 years parts warranty.
- > Cylinder manufactured in high grade Duplex Stainless Steel specially selected for its high strength and resistance to stress and crevice corrosion.
- > Lightweight construction and modern appliance look.
- > Flat base for additional stability.
- > Pre-fitted pipework to save time and give a consistent finish.
- > Embossed labeling of connections on casing.
- > Insulated with 100%CFC free (ODP zero) polyurethane to minimise heat loss (50mm thick).
- > Long life 3Kw incoloy immersion heater with integral thermostat and thermal cut out (immersion upgrades to 6Kw/titanium available on request).
- > 1/2" temperature and pressure relief valve operating at 90 degrees/7 Bar.
- > 100% recyclable silver casing.

TUNDISH

on request)

EXPANSION VESSEL\*

\*Supplied with Elite Cyl models, Elite AIR features Internal expansion on domestic water side.

When SPACE is at a premium, our washing machine frames are the solution.

Our washing machine frames are perfect for saving space in apartments, allowing a full cylinder to be supported above a white goods appliance.

As part of our desire to fulfil any installation requirement, we can provide our space-saving handmade washing machine frames. These are perfect for utilising space in smaller apartments, meaning that an unvented cylinder can be mounted above a washing machine in an airing cupboard - perfect in combination with our direct pre-plumb units.

- > Finished in powder coated grey.
- > H900mm x W660mm x D660mm.
- Capable of supporting full weight of any of our domestic direct cylinders Elite Cyl or Elite Air, 60-300L.
- > Washing machine frame part number: UKX066.

Combining these frames with our pre-plumbed direct cylinder range gives a compact and tidy look to the airing cupboard. Utilising the Elite Air model would also eliminate the need for any expansion vessels, saving further space as well as time on installation!

REDD provide designs for all types of heating, plumbing and renewable energy systems. These designs can incorporate natural gas, low pressure gas (LPG), electric or oil-fired boilers, air source heat pumps (ASHP) or ground source heat pumps (GSHP) – Plus whatever Building regulations, SAP calculations or the client requires.

Email your design enquiry to designs@reddesign.uk

Renewable Energy Domestic Designs (REDD) core business is to provide a free-of-charge heating & plumbing design service to the new build housing sector. This is a 100% independent design company, able to provide designs for the domestic new build market incorporating any number of gas, electric or renewable energy based options.
